Clement Krouse, Director

Center for Labor Analysis
Stephen Trejo, Director
A Special Farewell

It is with bittersweet feelings that we, the staff of the Community & Organization Research Institute, say farewell to Jack Votey, who is retiring after more than two decades of service to the university. While we wish Jack the very best during the coming years, we will miss him greatly.

As Director of CORI, Jack has provided the necessary leadership during difficult times of growth and change, and has built us into a flagship ORU at UCSB. A few statistics will serve to recount part of CORI's success story. In 1972-1973, CORI administered extramural research grants of well under $100,000. In that year, only eleven proposal were submitted through the CORI office. By 1992-1993, CORI’s extramural funding had reached approximately $5 million, with fifty submitted proposals totalling $8 million. During Jack’s tenure, seven research centers have also been established, providing opportunities for multidisciplinary research in a wide range of areas. In addition, our clientele list has expanded to become the second largest on campus. Our staff has grown apace, a long way from the time when CORI could accomplish its workload with a single Administrative Assistant.

But the real story is that Jack accomplished this astonishing growth with a gentle yet firm style of leadership, never-ending good humor, and an abiding sense of fairness. These are all memories that will remain with us for years to come.

Goodbye Jack. Thank you, and the very best of luck from all of us!
THE DIRECTOR'S STATEMENT

Goals and Purposes for Which CORI Was Established

CORI's original charge has been to "serve as a major resource for basic research in the social sciences." Further, "faculty participation in interdisciplinary research" was to be encouraged. With the overlap in areas of interests among disciplines in the College of Letters and Sciences, and even, occasionally, extending to the College of Engineering and to the Graduate School of Education, CORI clients come from a much broader base than anticipated when CORI was founded. Thus, over the past twenty years, CORI has become an environment in which research has been encouraged from the social, behavioral and policy sciences and humanities, both within and across disciplines.

The most frequently mentioned measure of success for an ORU, funding for clients' research, has increased for CORI over the fiscal years 1987-88 through 1992-93 by an average of almost 23 percent annually, a further improvement over the successful history reported in the most recent Five Year Review. But quantity of funding is not the only measure of CORI success, nor has it been the sole objective of the efforts of those responsible for CORI's growth. Considerable effort goes into finding ways that researchers in different disciplines, but with common interests, can become involved in mutually beneficial research activities.

Centers of Research Serving the Academic Needs of the Community

To help to serve the instructional and research missions of the campus, a number of centers have been established within CORI for groups of researchers with common interests. Among these is the Meso American Research Center, directed by Anabel Ford. That group has been active in obtaining grants. Additionally, by creating interest in archaeological research in the Americas among the general public, substantial gifts to the University are generated annually supporting their research. Both undergraduate and graduate students are actively involved in the field research.

The Center for Global Studies, directed by Richard Appelbaum, has been hard at work encouraging involvement in research with an international or global focus. Typical has been Applebaum's own work, initially funded by the University's Pacific Rim Research Program, that focuses on international labor markets and the creation of commodities involving multiple labor markets and nations. A major task completed by the Center this year has been the expansion and refinement of a database on UCSB faculty involvement in research topics focusing on areas of the globe other than the U.S. Better information on the nature and extent of this research will complement ongoing campus efforts to expand and create new academic undergraduate and graduate programs with a global focus. It is expected that these efforts will link with, and reinforce, campus involvement in a more broadly defined Education Abroad Program.

The Health Data Research Facility, directed by Ronald Williams, originally focused on economic factors relating to neonatal and perinatal mortality. That research led to the
development of systems to facilitate the collection of birth and death data so that improved efficiency in data collection could lead to more prompt identification of factors leading to improvements in survival rates and consequently to better management of related aspects of the health care system in California and three other states. The software developed by this group has rapidly become the standard for the state collection process for infant birth and death statistics. Cumulative extramural funding received by the Facility presently exceeds $4.4 million.

The Center for Labor Analysis, directed by Steven Trejo, involves primarily economics faculty and graduated students. An active seminar program is maintained each academic quarter that invites presentations from distinguished visitors from other universities, UCSB faculty and graduate students. Topics range from issues of education's contribution to individuals' earnings to problems of health care, crime, international migration, and effects of marriage on mobility in third world countries.

The Center for the Study of Discourse, directed by Sandra Thompson and John DuBois, involves scholars in linguistics, psychology and sociology. A major project is the creation of a corpus of American English. Another focuses on the language of the (local) Barbereno Chumash.

A considerable body of research conducted within CORI is not related to any of these groups. Major projects relate to the environment, speech and hearing, political participation in the former Soviet Union, civil society in China, the role of religion in the social order of Los Angeles, and the training of graduate students to deal with problems in special education. Invariably, these projects involve graduate students and frequently undergraduates as well.

A further service to the campus community has been CORI's role in stimulating a response to the UC Pacific Rim Research Program. While this hasn't been an official responsibility of CORI, the Director has, for over three years, represented the campus on the Pacific Rim Research Program Executive Committee, and for the last three years has served as the chair of the campus committee. An aggressive effort has been made by the local committee to increase the quality and quantity of UCSB participation to the extent that, while we are not one of the larger campuses in the system, UCSB success in obtaining funding has been better than the UC average over the last three years. Because the disciplines most likely to be involved in the initiative tend to produce CORI clients, CORI tends to be the unit processing most of UCSB's proposals. There is an obvious link between the Pac-Rim program and the objectives of the Center for Global Studies that should only grow in the future.

Response to the Needs of the Public at Local, State and National Levels

Most of the research conducted through CORI from the social sciences and much that comes from behavioral sciences and humanities has implications for public policy. A few typical examples follow.
1. A study directed by Otis Graham, recently in the news and a part of CORI's effort to create a center focusing specifically on public policy, has been investigating the factors that led to the infamous Painted Cave fire and the measures adopted by the community to avoid future similar disasters;

2. The research by Wade Clark Roof, investigating the role religious institutions in Los Angeles have played in the rebuilding after the Los Angeles riots, is both timely and important.

3. A program conducted by Melvyn Semmel and Michael Gerber uniquely prepares graduate students in education for administrative roles in programs of special education. The uniqueness stems from the special attention given to the sorts of social problems with which graduates can expect to be confronted. This is done by involving students in relevant courses in social science topics. Special seminars are arranged with the instructors of such courses to expand the awareness of social problems likely to be anticipated by graduates in their future work and the range of solutions that might be available to them.

4. The ongoing studies by W. Douglas Morgan and Lloyd Mercer in economics and Dean Mann in Political Science relating to the administration and regulation of state water use continue to focus on issues vital to the State of California.

**Introspection and Efficiency**

This past year has been one of introspection. CORI had grown at the rate of more than 28 percent in the previous four years as a consequence of the rapid expansion of proposal submissions and grants funded that followed the welcoming into CORI of former SPRI clients. This had led to workload problems that the slower growth of staff support had not easily accommodated. Clients previously pleased and attracted by the quality of CORI services were unhappy. Some new clients, who had expected better, were disappointed. Support that had been promised at the time of CORI taking over SPRI's assets, should such problems arise, was not provided. Financial crisis gripped the campus.

It was clear by the Spring 1992 meeting of the CORI Advisory Committee that serious efforts needed to be undertaken. At the end of the Spring Quarter, a five week, minute by minute, tally of individual CORI staff time devoted to a long list of routine activities was conducted. During the Fall Quarter of 1992, a survey was conducted of CORI clients to obtain their perspectives on the areas that CORI had problems and to seek remedies. Concurrently, a spreadsheet study, using the data on time allocation for each member of CORI's staff, was completed by the director. That spreadsheet fed in to an overall time allocation spreadsheet for the combined operation. Discussions were held between CORI staff and the director about ways to reduce work load and/or improve efficiency.
More than half of the fifteen clients that responded in writing to the survey had only good things to say about the way CORI was dealing with work load problems, although most would have appreciated more timely reports on the status of their grants. Others had specific complaints or suggestions as to what problems needed attention. Staff worked hard to get caught up. Interestingly, the spreadsheet analysis, while it took a lot of time, primarily tended to confirm the wisdom of the existing work allocation among CORI staff, although it did confirm which areas were in most need of assistance.

The staff time that was added through temporary augmentations by the Office of Research, matched by the commitment of CORI discretionary funds, and the diligent efforts of the staff to take control, solved the work load problem, at least for the current level of demand. It was found that the level of work completed per staff unit of time also had improved. By the Fall meeting of the Advisory Committee, it could be reported that most grant financial statements were out on time. CORI clients were reporting satisfaction with the way staff were able to respond to their problems. The Advisory Committee was pleased with the turnaround. CORI staff were pleased with themselves. For her part in this turnaround, one of CORI’s staff responsible for CORI accounts was given a campus Citation of Excellence Award, for which one of the recommenders was one of CORI’s clients most vocal about the workload problems.

The down side of the events that transpired was that almost all of CORI’s discretionary funds were devoted to the staffing problem, in the face of inadequate support from the campus for workload. Because the final budget for CORI for the academic year was not known until well into December and the final outcome of the level of discretionary funding that would be available not known until considerably later, when we could be certain that the level of client services would not suffer further, very little of discretionary money was spent to stimulate proposal generation. What little was expected to be remaining was kept for a contingency fund after consultation with the Advisory Committee who agreed on the wisdom of the strategy.

The up side is that, because the staff were extremely cost conscious, and because CORI’s MSO maintained exceedingly tight budgetary control, CORI has carryover funds that should make it possible to manage effectively for the coming year at the current level of service. CORI may even have some discretionary funding available to the new director, providing that assurances from the Office of Research in regard to funding for staff are able to be turned into actual support.

*Plans for the Future*

CORI will be getting a new director, effective July 1, 1993. If that individual is the person whom I expect it to be, CORI will be in good hands. Future plans will be up to him. My expectation is that CORI will maintain some old directions and branch in to some stimulating new ones. The new director will soon be presenting his own agenda.

---

CORI RESEARCH CENTERS

California Growth Project
Participants: Harvey Molotch, Director
Kee Warner, Graduate Student, Sociology
The California Growth Project has been involved in studies of the effects of growth control on the economy and housing stock of California communities. The primary focus has been a comparison of the land use regulations of Santa Barbara county, the City of Santa Monica, and the cluster of cities making up western Riverside County. Funded by the California Policy Seminar (a joint initiative of the State government and the University of California), the project seeks results that will help guide state and local land use policy-making.

Center for Global Studies

Mayfair Yang

The Center for Global Studies' primary objective is to promote globally-oriented, multi-disciplinary research in the social sciences and humanities, including both basic and policy oriented research. During this past year, the Center has completed a survey which has identified UCSB faculty whose research is global, transnational or comparative in nature. The Center has created a database of its survey findings to identify different issue areas and will be organizing a series of meetings around these issues in an effort to encourage interdisciplinary research, bring faculty members together to exchange research findings, and provide an important campus resource for faculty to generate new ideas and efforts. In addition, the Global Studies Center, in collaboration with the Interdisciplinary Humanities Centers will be sponsoring a three day conference, "Exile in Los Angeles," to be held during late 1994.

The Global Studies Center is in the process of developing a journal, tentatively titled "Global Competition and Change", which will be co-edited by Dr. Appelbaum and Jeffrey Henderson of the University of Manchester Business School, UK. The journal will have boards of contributing editors centered in Asia, North America and Europe.
Center for Labor Analysis
Core Participants: Steven Trejo
Stephen Bronars
Ed Funkhouser
Jeffrey Grogger
Llad Phillips
Harold L. Votey, Jr.

The Center for Labor Analysis seeks to encourage interaction among UCSB researchers in the field of labor economics. The Center fosters labor research in two ways: by maintaining and updating an inventory of the large, publicly-available data sets (e.g., Census, Current Population Survey, National Longitudinal Survey, etc.) that have become indispensable for doing empirical research in labor economics, and by organizing a seminar series in which prominent outside scholars as well as UCSB researchers present the results of their recent work. In addition to making seminar presentations, visitors meet with faculty and graduate students on a one-on-one basis in order to share ideas and discuss ongoing research projects.

Center for the Study of Business and Public Policy
Core Participants: William S. Comanor
Stephen DeCanio
Ted Frech
M. Bruce Johnson
Clement G. Krouse

The Center's aim is to stimulate discourse and research in matters of business and public policy by:

-- creating a forum for scholarly research in applied economics
-- sponsoring occasional papers and seminars on problems of particularly importance
-- encouraging the exchange of experience and ideas between those involved in academic research and professional practice and,
-- providing a research environment and funding support for graduate-level students.

Center for the Study of Discourse
Co-Directors: Sandra A. Thompson and John Du Bois

The Center for the Study of Discourse, established in 1989, was conceived to be a focus for the Linguistics Department's project to establish a Corpus of Spoken American English, as well as for ongoing research in the area of discourse across campus. The Center aims to coordinate and serve as a clearing house for interdisciplinary approaches to discourse research; to this end, the Center sponsors lectures and social events throughout the academic year. Several joint research projects are currently underway.

Center for the Study of Religion
Participants: Wade Clark Roof, Director
The Center for the Study of Religion's main objective is to provide support for multidisciplinary research efforts in the area of comparative religion and religion's impact on modern society. During the past year, research projects have examined a variety of issues including a study of biography and religion, a comparative study of Buddhists, Muslims and Evangelical Christians in California, and an ongoing study of the role of religious groups in the re-building of Los Angeles after the 1992 riots.

**Health Data Research Facility**

*Participants: Ron Williams, Director  
Peter Chen, Programmer Analyst  
John Marinko, Programmer Analyst  
Ellen Needham, Programmer Analyst  
Niloufar Ameli, Programmer Analyst  
Julie Kluss, Secretary*

Over the last decade, the Health Data Research Facility has become internationally known as a center for applied research using vital statistics in public health data. The Health Data Research Facility is recognized as a source of expertise in the growing field of perinatal epidemiology, and has been credited with providing greater validity to the use of vital statistics records as a source of data for medical research. The Facility's short run objectives are to continue its development, implementation and dissemination of the Automated Vital Statistics System (AVSS) software which was developed at the Facility, and to further enhance methods for generating the data for research on births and perinatal and neonatal mortality. Now operational in nearly 300 sites in four states, AVSS is an on-line public health information system that electronically captures and communicates vital records and communicable disease data. Real-time data from AVSS is expected to drive immunization tracking systems that are beginning to evolve as a result of the Clinton Administration's public health initiatives. In addition to these efforts, the Health Data Research Facility annually publishes the *Maternal and Child Health Data Base Descriptive Narrative* which is used by hundreds of community-based agencies as well as by the Department of Health Services, the Office of Statewide Health Planning and Development, Kaiser Permanente, Bank of America, and Consumers Union.

**MesoAmerican Research Center**

*Director: Anabel Ford*

The goals of the MesoAmerican Research Center (MARC) are to advance research in the area of Mesoamerica and disseminate research results within the scientific and public arena. MARC consists of a loosely organized group of researchers whose activities include anthropological and archaeological research projects in Mexico, Guatemala, Belize, Salvador and Honduras. These projects have focused on social issues and their impacts on Mesoamerican cultures as well as issues of US/Mesoamerican immigration and eco tourism. MARC has sponsored conferences symposia, and workshops at UCSB and in Mesoamerica. Proceedings from these events have been published in the United States and Europe.
Pacific Rim Project on Mathematics Achievement
Participants:  Hsiu-Zu Ho, Director
               Jules Zimmer, Co-Director
               Chiang-Pei Wang, Beijing Institute of Education, Beijing, China
               Soy-Yung Chiu, National Education College, Taipei, Taiwan
               Yasuo Nakazawa, Shirayuri College, Tokyo, Japan

This research unit is concerned with cross-national investigations of factors that influence mathematics achievement in China, Japan, Taiwan, and the United States. Factors examined include demographic variables, related cognitive abilities, mathematics curriculum, and attitudes, expectations, and beliefs of parents, teachers and students. The investigations are focused on within-nation as well as between-nation variation.
WORKSHOPS, SEMINARS, CONFERENCES

Econometrics Seminars 1992-93 -
Douglas Steigerwald, Workshop Coordinator

Fall Quarter

October 7: Linda Tesar, UC Santa Barbara
"Home Bias and the Globalization of Securities Markets"

October 21: Keunkwan Ryu, UC Los Angeles
"Group Duration Analysis of the Proportional Hazard Model"

October 28: Gloria Gonzalez-Rivera, UC Riverside
"New Extensions of Risk: Conditional Versus Unconditional Moments"

November 4: Jati Sengupta, UC Santa Barbara
"Market Volatility and Portfolio Efficiency"

November 11: John Hsu, UC Santa Barbara
"Bayesian Analysis: An Alternative Approach"

November 18: John Campbell, Princeton University
"Why Long Horizons? Asymptotic Power Against Persistent Alternatives"

Winter/Spring Quarter

March 3: Maso Ogaki,
"Wealth Varying Intertemporal Elasticities of Substitution"

March 10: Charles Manski, University of Wisconsin
"What Do We Learn from Controlled Experiments?"

Labor Economics Workshops - 1992-93
Steve Trejo, Workshop Coordinator

Fall Quarter

September 28: Eric Eide, UC Santa Barbara
"Changes in College Skills and the Rise in the College Wage Premium"

October 20: Jeff Grogger, UC Santa Barbara
"Does School Quality Explain the Present Black/White Wage Trend?"
October 29: Kathryn Shaw, Carnegie Mellon
"Labor Supply, Human Capital Investment, and the Changing Distribution of Family Income"

November 23: David Cutler, Harvard University
"Why Doesn't the Market Fully Insure Long-Term Care?"

November 24: Duncan Thomas, Rand Corporation and Yale University
"On the Road: Marriage and Mobility in Malaysia"

Spring Quarter
March 11: Janet Currie, Massachusetts Institute of Technology
"Medicaid and Medical Care for Children"

March 19: Shelly Lundberg, University of Washington
"On the Persistence of Racial Inequality"

April 6: Steve Trejo, UC Santa Barbara
"The Decline in Immigrant Labor Market Skills: Did It Continue in the 1980s?"

April 12: Derek Neal, University of Chicago
"Industry-Specific Human Capital: Evidence from Displaced Workers"

April 26: Christopher Erickson, UC Los Angeles
"Collective Bargaining in the Aerospace Industry in the 1980s"

May 3: Kathleen McGarry, UC Los Angeles

Competition Policy in a Global Economy Conferences
William Comanor, Conference Director
Santa Barbara, California
January 9 - January 12, 1993
&
Paris, France
May 13 - May 15, 1993

Attending this conference, which was funded from a grant from the Japan Foundation, were leading scholars from Japan, the US, Canada, and Europe. In attendance were:
Akira Gota, Department of Economics, Hitotsubashi University, Tokyo, Japan
A. Edward Safarian, Business Economics, Center for International Studies, University of Toronto, Ontario, Canada
Kotaro Suzumura, Professor of Economic Systems Analysis, Institute of Economic Research, Hitotsubashi University, Tokyo, Japan
Annette Bongardt, International Center for Economic Research, Torino, Italy
Werner Meissner, Johann Wolfgang Goethe University, Frankfurt, Germany
Edward Safarian, Center for International Studies, University of Toronto, Ontario, Canada
Leonard Waverman, Center for International Studies, University of Toronto, Ontario, Canada
Eleanor Fox, School of Law, New York University, NY
Calvin Goldman, University of Toronto, Ontario, Canada
Stephen Martin, Department of Economics, European University Institute, Florence, Italy

In attendance at the second "Competition Policy in a Global Economy" conference were:
Akira Gota, Department of Economics, Hitotsubashi University, Tokyo, Japan
A. Edward Safarian, Business Economics, Center for International Studies, University of Toronto, Ontario, Canada
Kotaro Suzumura, Professor of Economic Systems Analysis, Institute of Economic Research, Hitotsubashi University, Tokyo, Japan
Annette Bongardt, International Center for Economic Research, Torino, Italy
Leonard Waverman, Center for International Studies, University of Toronto, Ontario, Canada
Stephen Martin, Department of Economics, European University Institute, Florence, Italy
Neil Campbell, McMillan Binch, Barristers & Solicitors, Toronto, Ontario, Canada
Hiroyuki Odagiri, Institute of Socio-Economic Planning, University of Tsukuba, Ibaraki, Japan
Janusz Ordover, CV Starr Center for Applied Economics, New York University, NY
RESEARCH IN PROGRESS  
JULY 1992-JUNE 1993

APPELBAUM, RICHARD, Principal Investigator  
BONACICH, EDNA, Co-Principal Investigator  
Garment Manufacturing in Los Angeles: Race Ethnicity, Immigration, and Gender in a Changing Industry  
John Randolph & Doris Haynes Foundation: APPELBAUM/HAYNES  
11/21/91-6/30/93  
The principal investigators have examined all layers of the apparel industry from retailing of goods to factory production. The research, with its focus on Los Angeles, entailed a combination of in-depth interviews, surveys, and ethnography, and was particularly concerned with spatially-concentrated networks. This research involved extensive use of geographic information systems, and mapped all manufacturing and contracting activities in the Los Angeles area.

APPELBAUM, RICHARD, Principal Investigator  
Commodity Chains and Industrial Districts in the Pacific Rim: A Comparative Study of Three Industries  
Pacific Rim Research Program: APPELBAUM/PAC RIM  
7/1/90-6/30/94  
This project involves a multi-university, international interdisciplin ary group who focus on the "commodity chain" of globalized networks involving design, production and marketing of a single product, and "industrial districts" which focuses on spatial interdependencies. Two approaches are being used: a macro-level study of trade and production data within the Pacific Rim, utilizing geographic information systems (GIS) as a basis for spatial-based network and cluster analyses; and descriptive case studies of selected industries in Seoul, Taipei, Hong Kong, Tijuana, and Los Angeles.

BADASH, LAWRENCE, Principal Investigator  
Tale of a Nuclear Winter  
National Science Foundation: DIR90-12305  
9/1/93-8/31/92  
This project studied (1) the ways in which several scientific disciplines came together to enable the nuclear winter phenomenon to rise from the computer printout, (2) the media treatment of the developing subject, and (3) the political reaction to calls to reduce the American nuclear arsenal as a means of precluding this particular disaster.
BIELBY, WILLIAM T., Principal Investigator  
DENISE BIELBY, Co-principal Investigator  
*From Market to Hierarchy: Industrial Change and the Employment Relation in Television Production*  
National Science Foundation: NSF SES89-10039  
The principal investigators have examined how changing industrial and organization context, technology, and business conditions shape the organization of work and careers in prime time television production. In particular, they focused on the causes and consequences of a shift in the televisions writer's employment relation from *market*-based freelance arrangements to *hierarchically*-based staff arrangements. Hypotheses were derived from transaction cost theories of industrial organization, models of cumulative advantage in career trajectories, and recently developed approaches to the study of the production of popular culture.

BOVE, FREDERICK, Principal Investigator  
*State Evolution on the South Coast of Guatemala*  
National Science Foundation: NSF BNS-9108926  
7/15/91-8/31/93  
Previous research on the Pacific Coast of Guatemala has produced evidence of the local development of an early state-like polity centered at Balberta which gave way to a more permanent regional organization by the Late Classic period. This project examined the unit by focusing on social and political variables as expressed in settlement pattern changes and economic variables dealing with production and exchange, and relationships to the greater sociopolitical context. A two year field and laboratory project of regional survey, mapping, and methodological excavations provided a body of data to comprehend the origins of the state in this poorly known area.

COMANOR, WILLIAM, Principal Investigator  
*Competition Policy in a Global Economy*  
The Japan Foundation: AR91-0051  
3/1/92-12/31/94  
This project brings together leading scholars in Japan, the USA, the European Community and Canada in a project aimed at analyzing conflicts in domestic competition policies and designing a set of policy alternatives to ease real friction and to improve trade and FDI flows and innovations. The research will analyze the underlying economic and strategic meaning of domestic competition law in a global economy.

DEACON, ROBERT, Principal Investigator  
*Political Stability, Security of Tenure, and Natural Resource Conservation in Developing Countries*  
4/1/92-3/31/94
(DEACON - continued)
This research is studying the way tropical forests are used in developing countries, and is assessing empirically how stable political and legal institutions affect observed measures of the way these resources are used. Empirical analysis, based on the theoretical framework, will compare the principal hypothesis to two alternatives: that tropical deforestation and similar phenomena are caused by the process of economic growth; and that the primary cause of these outcomes is population pressure.

DEACON, ROBERT, Principal Investigator
The Political Economy of Natural Resources in Developing Countries: Selected Studies
National Science Foundation: NSF SES91-21859
4/1/93-3/31/95
The aim of the research is to enhance knowledge of the political determinants of insecure ownership and to quantify the environmental effects that result. Through seven empirical studies, the principal investigator will examine resource development and extraction, and the effect of ownership insecurity on the frequency and structure of transactions involving natural and environmental assets. The objects of analysis are the pattern of deforestation that results from commercial logging, the incentive to invest in plantation forests, the mix of commercial products obtained from forests, the extent of fossil fuel exploration in developing countries, and the rate at which fossil fuel resources are extracted.

FORD, ANABEL, Principal Investigator
Maya Development in the Upper Belize River Area
National Science Foundation: NSF BNS-9024104
4/15/91-12/31/92
The Belize River Archaeological Settlement Survey (BRASS), located in the eastern periphery of the central Maya lowlands has developed an important settlement survey and excavation data base pertaining to domestic activities as reflected in residential middens. This research supported the phase of broad horizontal residential unit excavation of previously tested units. The collection from these residential units are providing a basis for accurately describing and interpreting the organization of residential production and consumption activities in the Maya area.

FORD, ANABEL, Principal Investigator
Household Economic Organization and Community Integration: The Basis of Social Complexity in the Central Maya Lowlands
National Science Foundation: NSF BNS91-21701
1/1/92-11/30/93
Building on a solid regional data base on the archaeological settlement in the Belize River area, this research has developed an interpretation of the operation of regional, local and community tiers of ancient Maya society. This principal
investigator has completed intensive excavations at representative residential units and evaluated production and consumption within and between major landform zones by residential size and rank.

FORD, ANABEL, Principal Investigator
Environmental and Social Distinctions in Chipped Stone Assemblage at Residential Units in the Belize River Area (REU Supplement to Grant No. BNS-9121701)
National Science Foundation: NSF DBS-912701
(FORD - continued)
3/1/92-6/30/93
Supplemental funds were provided to undergraduate honors student Greg Morre to support research on the chipped stone assemblages from ancient Maya house sites. His work was in collaboration with the Dr. Ford's BRASS project.

FUKUI, HARUHIRO, Principal Investigator
Informal Politics, Democracy, and Patterns of Economic Development in China, Japan, South Korea, and Taiwan
Pacific Rim Research Program: FUKUI/PAC RIM
7/1/90-6/30/94
This project is designed to investigate forms and functions of informal politics, i.e., politics not subject to control by formal authorities. In the first phase, (1991-92), a set of papers were prepared on informal politics of elite recruitment in China, Japan, South Korea, and Taiwan. A joint symposium was held in Hong Kong in August 1992 and papers presented at the symposium are being revised for future publication.

GERBER, MICHAEL, Principal Investigator
SEMMEI, MELVIN, Principle Investigator
SE/PREP: A Project for Doctoral-Level Leadership Personnel Preparation in Collaboration with the Social Sciences
U.S. Department of Education: H029D20030
9/1/92-8/31/97
This five year project will develop a new doctoral training model at UC Santa Barbara for preparing researchers, teachers, trainers, and administrative leaders in the field of education for individuals with disabilities. During this first year, project faculty have recruited doctoral students who wish to pursue careers related to education of individuals with disabilities, and have established a national network of university programs with large ethnic minority student enrollments to refer potential leadership trainees. In addition, graduate students on this campus have been recruited to serve as research mentors for minority undergraduates. The mentorship/recruitment program will provide early research experience for potential doctoral students as well as research leadership training for students enrolled in the doctoral program.
INGHAM, JANIS, Principal Investigator

*Predicting Therapy Outcome in Children Who Stutter*

CAL STATE FULLERTON: 8120

9/1/93-8/31/95

This project is part of a grant funded by the National Institute of Health which is being directed by Dr. Glyndon Riley of the California State University of Fullerton. Dr. Ingham will be designing and conducting a range of procedures for treatment of stuttering in children at the UCSB Speech and Hearing Clinic. She will also design and conduct the principal investigations, train the research assistants and clinical specialists from UCSB and Cal State Fullerton in regard to Extended Length of Utterance Treatment procedures, and oversee the assessment and treatment of children at the clinic. Dr. Ingham and a speech and hearing specialist will collect and analyze speech samples obtained from on and off-clinic sites.

INGHAM, ROGER, Principal Investigator

*Time Interval Investigations of Stuttering Measurement*

National Institute of Health: PHS 5 R01 DC0060-03

12/1/90-11/30/93

This grant, currently in its third year, has been investigating procedures, via the use of artificial neural networks, that will possibly lead to a means of identifying intervals of speech that judges agree contain stuttering. The goal of this research is to develop a reliable method for measuring chronic stuttering in the continuous speech of persons with this speech disorder.

JOCHIM, MICHAEL, Principal Investigator

*Regional Settlement Systems in Southwest Germany*

National Science Foundation: NSF BNS92-01023

2/1/92-7/31/94

This project is the initial phase of a long-term study of regional patterns of settlement and land use during the Paleolithic, Mesolithic and Neolithic of southwestern Germany. This first phase has two components: 1) the development of a database of archaeological, environmental, paleoenvironmental, and modern land use information for a 40 x 100 kilometer study area extending from the Danube south to the Alps; and 2) a surface survey of a 45 square kilometer portion of the study area adjacent to the Federee.

KAPLAN, CYNTHIA, Principal Investigator

*Political Participation in the Soviet Union: Estonia and the RSFSR*

National Science Foundation: NSF SES9122389

2/1/92-1/31/94

By using a two stage sample drawn from ethnically diverse areas of the former Soviet Union, this research is assessing the influence of structural and cultural factors on the nature of mass-elite relations in the emergence of new political systems. Respondents to a survey drawn from Estonia, Russian and the non-
Russian Autonomous Republics of the RSFSR are being examined for the impact of ethnicity on political behavior during a period of economic and political change.

KAPLAN, CYNTHIA, Principal Investigator
BRADY, HENRY, Co-Principal Investigator

Russian Nationalism and the Politics of Transition
U.S. Institute of Peace: USIP04992F
4/1/93-8/31/94
This project will examine Russian nationalism and ethnicity in Russia, Tatarstan, and Estonia, based on survey interviews administered in 1991 to almost 20,000 respondents in those areas, and 6,500 survey interviews taken in 1992. The researchers will compare the nature and development of Russian nationalism in Russia, Tatarstan, and Estonia, and provide an assessment of the potential for nationalist violence and how policies can be devised for resolving ethnic conflicts peacefully.

LOOMIS, JACK, Principal Investigator
GOLLEDGE, REGINALD, Co-Principal Investigator
KLATZKY, ROBERTA, Co-Principal Investigator

Navigation Aid for the Visually Impaired
Public Health Service: R01EY06740
8/1/92-7/31/97
This project consists of both basic and applied research. The applied research will be concentrated on developing a microcomputer-based navigation aid for the visually impaired. This device will inform the visually impaired user of his or her location and provide information about the local environment. The basic research will examine the inherent limitations on navigation without sight and the implications, whether positive or negative, of device-aided navigation for learning about complex environments.

LOVE, MICHAEL , Principal Investigator
VOORHIES, BARBARA , Co-Principal Investigator

Archaeological Exploration of the Ujuxte Region, Pacific Guatemala
Heinz Charitable Trust: HEINZ/LOVE
2/1/92-4/1/93
This principal investigator has conducted an intensive survey of approximately 20 square kilometers surrounding the archaeological site of Ujuxte on the Pacific coast of Guatemala. This survey has evaluated the density of settlement in all periods and the types of sites, surface conditions, and specific conditions of land tenure. A less intensive reconnaissance of approximately 100 square kilometers of territory surrounding Ujuxte was also made to assess the nature and conditions of roads, land tenure, types of crops to be encountered, and the annual cycles of these crops.
MCDONNELL, LORRAINE, Principal Investigator
Assessment Policy and Education Policy
UC Los Angeles (CRESST): R117G10027
12/1/92-11/30/93
As part of the previous work undertaken for CRESST, the principal investigator is examining the implementation of four state assessment initiatives in local schools and classrooms. This study focuses on the expectations that policy makers hold for different assessment strategies and the factors that shape local response to those initiatives.

MITHUN, MARIANNE, Principal Investigator
Barbareno Chumash Grammar
National Science Foundation: NSF BNS-9011018
11/1/92-10/31/94
The goal of this project is to prepare a functionally-based reference grammar of Barbareno Chumash. The research participants have organized manuscripts and have been entering them into a computer in a form that can be sorted by a concordance program, making it possible to extract all instances of morphemes in the corpus, in context, with literal and free translations. During the final year of the project, these studies will be worked into a comprehensive grammar of the Barbareno Chumash language.

ROOF, WADE CLARK, Principal Investigator
Biography and Faith: Narrative Accounts
Lilly Endowment, Incorporated: Lilly 910575
9/1/91-8/31/93
This principal investigator has studied baby boomers (born from 1946-62) through in depth examination of their religious and spiritual lives. This research has analyzed how baby boomers' social experiences from growing up in the 1960s influenced their attitudes, and how those experiences continue to shape their values and form a distinct generational experience. One aspect of the research has focused on what the words "religious" and "spiritual" mean to boomers. Another aspect has reviewed their occupational histories and how these work experiences and choices have been shaped by their particular spiritual values.

ROOF, WADE CLARK, Principal Investigator
Renegotiating the Social Contract: Religion and Public Life in Los Angeles
John Randolph & Doris Haynes Foundation: Haynes Fnd/Roof
1/1/93-12/31/93
This project has focused on the activities of religious leaders as they work with other community leaders to create civic peace within Los Angeles' racially diverse culture, and how these activities have been shaped by the 1992 riots. The objectives include an examination of the political and economic roles of religious leaders and their interaction with community leaders on schooling, policing and
economic development issues, the degree of cooperation among religious leaders and the models of community and regional development to which they are committed, and finally, an analysis of the rhetoric used by religious leaders as they communicate across cultural boundaries on the pressing needs of their community.

ROOF, WADE CLARK, Principal Investigator
Religious Outsiders on the West Coast
The Pew Charitable Trusts: PRE CTR TR
12/2/92-12/31/95
The purpose of this research is to study religious groups regarded as "outsiders" and their relationships to other groups viewed as religious "insiders," as they have emerged on the California West Coast. Three groups are singled out for focused consideration--Buddhists, Muslims, and Evangelical Christians. The research will include: 1) a historical study of how these groups have evolved; 2) an analysis of cultural and religious styles; 3) an analysis of how "outsiders" are perceived by old-line Protestants, Roman Catholics, and Jews; and 4) an analysis of views of selected community leaders, religious leaders, seminary presidents, and journalists.

STONICH, SUSAN, Principal Investigator,
BORT, JOHN, Co-Principal Investigator (East Carolina University)
The Social and Environmental Consequences of Shrimp Mariculture Development in Central America
Pacific Rim Research Program: PAC RIM/Stonich
7/1/92-6/30/94
The principal investigators are studying the interrelated social, economic, and environmental effects of the expansion of shrimp mariculture along the Pacific Coast of Central America. Using an approach which integrates ethnographic, geographic and survey methods, this research combines human ecological and political-economic analysis to determine the multilevel linkages between social processes and environmental destruction and the associated policy implications. This project is designed to facilitate planning of larger interdisciplinary proposals which will be submitted to a variety of private and public agencies.

SUTTON, JOHN , Principal Investigator
The Dynamics of Denominationalism in American Protestantism, 1890-1980
Lilly Endowment Incorporated: LILLY 900123
6/1/90-6/30/93
The purpose of this project is to understand the patterns of denominationalism in American Protestantism from the period 1890 to 1990. The Principal Investigator is gathering a data set on the formation of American Protestant denominations by analyzing the life histories of 175 mainstream Protestant denominations. This information will specifically focus on schisms through which new denominations were created, and mergers, through which old denominations were dissolved.
This quantitative life history data will be supplemented with contextual information about specific merger and schism events from archival and secondary sources.

SUTTON, JOHN, Principal Investigator
*Prisons, Asylums and the Welfare State: Patterns of Social Control in Five Common-Law Countries*
National Science Foundation: NSF SES-9122424
7/1/92-6/30/94
This project is a comparative study of inmate capacities in prisons and mental hospitals against the background of welfare politics in five common-law countries (the U.S., the United Kingdom, Canada, Australia, and New Zealand) over the period 1955-1985. The study is assembling quantitative data on institutional capacities, welfare benefits, and other independent variables. Dynamic models of institutional growth and decline are being estimated, using pooled time-series cross-section techniques.

THOMPSON, Sandra, Principal Investigator
DUBOIS, Jack, Co-Principal Investigator
CHAFFE, Wallace, Co-Principal Investigator
*Corpus of Spoken American English*
National Endowment for the Humanities: RT2143392
7/1/92-6/30/94
This project will create a large computerized database of 1 million words of spoken American English, and disseminate it in both a printed and an interactive microcomputer format that will allow simultaneous access to transcription and sound. This database is expected to generate a broad range of new research in language and speech. The creation of the Corpus of Spoken American English will be coordinated with a worldwide effort to compile an International Corpus of English.

TOOBY, John, Principal Investigator
*PYI: Evolutionary Biology and Human Psychological Adaptation*
National Science Foundation: BNS-9157449
James S. McDonnell Foundation: Matching Funds for PYIAward BNS9157449
7/1/92-7/31/96
The research plan for this project encompasses the mapping of human cognitive mechanisms (adaptive specializations) through the application of cognitive experimental methods and cross-cultural studies to models of adaptive problems derived from evolutionary biology and paleoanthropology. Specific adaptive problems being investigated include cooperation, coalition formation, threat interpretation, bluff detection, probabilistic reasoning, incest avoidance, and contagion avoidance.
WALKER, PHILLIP , Principal Investigator  
*Native American Graves Protection and Repatriation Act of 1990*  
Department of the Navy: N69711-92-LT-2023  
9/21/92-12/1/93  
The purpose of the San Clemente Island Native American Graves Protection and Repatriation Act project is to inventory and summarize all archaeological collections that have been removed from San Clemente Island. In addition, the project will determine who, if anyone, is culturally affiliated with these collections in preparation for future repatriation of the archaeological materials. The project entails contacting every museum or facility that curates San Clemente Island materials, visiting the collections to perform the inventory and/or summary, and creating a final report on the research.

WILLIAMS, RONALD , Principal Investigator  
*Maternal and Child Health Database (Renewal)*  
California Department of Health: MCH 91-12638  
7/1/92-6/30/94  
Research continues on the Maternal and Child Health Database project, initiated in 1976. Efforts will be concentrated on maintaining and augmenting the hospital specific MCH Database for California cities. An updated Maternal and Child Health Data Base Statistical Appendix and Descriptive Narrative will be made available annually for the funding period.

YANG, MAYFAIR , Principal Investigator  
*Voluntary Associations and the Emergence of Civil Society in China*  
National Science Foundation: NSF BNS-9057505  
8/15/90-7/31/94  
This Presidential Young Investigator Award project is in its second year of funding. During this funding period, the Principal Investigator has been concentrating on two field sites and two fieldwork topics. The first topic has focused on the lineage organization and ritual revival in a rural town outside the city of Wenzhou, Zhejian Province and the second on film criticism and reception among the masses in urban and rural Xi’an, Shaanxi Province.
